

Please do not create any new law that will lessen the effectiveness of the Indiana Telephone privacy act! Since the laws effective activation in my home on Oct. 2nd I have received only one call and that was from a newspaper which is permitted by the Indiana law. Our law has been extremely effective which is unusual for a governmently policy designed for "The Good Of the People" it would be a travesty to inact a federal law which would take the teeth out of our Indiana law. Do something unusual and don't fix that which is not broken! Thank You!
